bauku – Next Level

After the successful and punctual delivery of several profilline p-series extrusion lines to customers in China and Iran now we are ready for the next level.

In order to expand the range of products, the production capacity and the competence in machinery design, the bauku team now joins the **Boyke Technology** Ltd. in Lindlar, Germany. Boyke is already a reliable and powerful partner for more than 10 years and together we present an alliance for a strong branding for taylor made machineries.

Matthias Boyke

Marcus Hawerkamp

The Boyke Group stands for the three divisions up to now:

Extrusion Systems / Wear Technology / Press Systems

All three units are designing specialized machinery for the plastic production. The bauku winding technology is now branch number four and constitutes the perfect complement to the Boyke Extrusion Systems.

Because quality knows no compromises, our customers can count on the best extrusion lines Made in Germany at competitive prices. The bauku extrusion technology Ltd., owned 100 % by Mr. Hawerkamp is focused on high quality in advanced winding technology since the year 1956 while providing exceptional value.

Boyke is offering expert knowledge as a leading supplier for single screw extruders, control systems and programming for decades.

Join the bauku/Boyke world, trust in the competence of two strong partners.
